I'm a keen and Passionate Freelance Photographer based in Adelaide, South Australia. I try hard to get, and want, the Best possible quality photo of that Product or Promotion. It is my aim to capture the best presentation and still remain within your requirements.

I have been taking and processing Digital Still Photos for over 10 Years and I am confident I can provide you with all your Still Photography needs. Post production of all my RAW images are done in Photoshop and I work hard to give each image that extra "punch".
